

Md Irfan

Full Stack Developer

7097136750 | irfanmd2028@gmail.com | linkedin.com/in/md-irfan-2492061b9 | github.com/mdirfan-007

SUMMARY

Frontend-focused Full Stack Developer with hands-on experience building responsive web applications using React.js, JavaScript, Tailwind CSS, Node.js, and MongoDB. Experienced in developing reusable UI components, integrating REST APIs, and implementing authentication workflows through real-world projects and internship exposure. Actively seeking frontend or junior full-stack developer roles.

EDUCATION

Rajiv Gandhi Prodyogiki Vishwavidyalaya

Bachelor of Technology (B.Tech) in Electronics and Communication Engineering

Bhopal, India

May 2021 – Aug 2024

Maulana Azad National Urdu University (MANUU)

Diploma in Engineering

Hyderabad, India

July 2017 – June 2020

EXPERIENCE

Full Stack Developer Intern

ZyrixCraft

July 2025 – Dec 2025

Remote, India

- Built and shipped full-stack features using React.js, Node.js, Express.js, and MongoDB in a startup environment
- Developed responsive, mobile-first interfaces with Tailwind CSS for real-world users
- Implemented authentication, API integrations, and async data handling for smoother user workflows
- Improved code maintainability using reusable components, modular logic, and clean architecture practices
- Worked closely with founders and senior developers using Agile practices, Git, and code reviews

PROJECTS

BiteReels – Video-Based Food Discovery Platform

[GitHub](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, ImageKit

- Engineered a short-form video discovery experience with infinite scrolling and mobile-first UI using React.js.
- Orchestrated JWT-based authentication with role-specific access for creators and administrators.
- Exposed RESTful APIs to support video uploads, content moderation, search, and user interactions.
- Enhanced media delivery performance by integrating ImageKit CDN with adaptive formats and compression.

CloudVault – Secure File Storage Service

[GitHub](#)

Tech Stack: Node.js, Express.js, MongoDB, JWT, Cloudinary

- Structured a secure backend service enabling authenticated file uploads, downloads, and access-controlled storage.
- Hardened API access by wiring JWT authentication and protected routes for user-specific file visibility.
- Integrated Cloudinary for automated file optimization, compression, and format conversion.
- Standardized API organization using controllers and middleware to improve maintainability.

CodeSage – AI-Powered Code Review Platform

[GitHub](#)

Tech Stack: React.js, Node.js, Express.js, Google Gemini API

- Composed an AI-assisted code review pipeline that analyzes submitted code and returns structured feedback via the Gemini API.
- Stabilized backend request flow by introducing rate limiting, request debouncing, and centralized async error handling.
- Rendered a polished review interface featuring syntax-highlighted code input and markdown-formatted AI responses with aligned loading, error, and empty states for a predictable user experience.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React.js, NextJs, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Database / Cloud: MongoDB, Cloudinary, ImageKit

Authentication: JSON Web Token (JWT), Sessions, Clerk

Tools: Git, GitHub, VS Code, Postman
