

Md Irfan

Full Stack Developer

7097136750 | irfanmd2028@gmail.com | [linkedin](#) | [github](#) | [X](#)

SUMMARY

Frontend-focused Full Stack Developer with hands-on experience building responsive web applications using React.js, JavaScript, Tailwind CSS, Node.js, and MongoDB. Experienced in developing reusable UI components, integrating REST APIs, and implementing authentication workflows through real-world projects and internship exposure. Actively seeking frontend or junior full-stack developer roles.

EXPERIENCE

Full Stack Developer Intern <i>ZyrixCraft</i>	Jul 2025 - Dec 2025 Remote, India
- Built and shipped full-stack features using React.js, Node.js, Express.js, and MongoDB in a startup environment. - Developed responsive, mobile-first interfaces with Tailwind CSS for real-world users. - Implemented authentication, API integrations, and async data handling for smoother user workflows. - Improved code maintainability using reusable components, modular logic, and clean architecture practices. - Worked closely with founders and senior developers using Agile practices, Git, and code reviews.	

EDUCATION

Rajiv Gandhi Prodyogiki Vishwavidyalaya <i>Bachelor of Technology, Electronics and Communication Engineering</i>	May 2021 - Aug 2024
Maulana Azad National Urdu University <i>Diploma, Engineering</i>	Jul 2017 - Jun 2020

PROJECTS

BiteReels – Video-Based Food Discovery Platform github
- Engineered a short-form video discovery experience with infinite scrolling and mobile-first UI using React.js. - Orchestrated JWT-based authentication with role-specific access for creators and administrators. - Exposed RESTful APIs to support video uploads, content moderation, search, and user interactions. - Enhanced media delivery performance by integrating ImageKit CDN with adaptive formats and compression.
CloudVault – Secure File Storage Service github
- Structured a secure backend service enabling authenticated file uploads, downloads, and access-controlled storage. - Hardened API access by wiring JWT authentication and protected routes for user-specific file visibility. - Integrated Cloudinary for automated file optimization, compression, and format conversion. - Standardized API organization using controllers and middleware to improve maintainability.
CodeSage – AI-Powered Code Review Platform github
- Composed an AI-assisted code review pipeline that analyzes submitted code and returns structured feedback via the Gemini API. - Stabilized backend request flow by introducing rate limiting, request debouncing, and centralized async error handling. - Rendered a polished review interface featuring syntax-highlighted code input and markdown-formatted AI responses with aligned loading, error, and empty states for a predictable user experience.

SKILLS

Languages: : JavaScript, TypeScript, HTML5, CSS3
Frontend: : React.js, Next.js, React Native, Expo, Tailwind CSS
Backend: : Node.js, Express.js, REST APIs
Database & Cloud: : MongoDB, Cloudinary, ImageKit
Authentication: : JWT, Session Management
Tools: : Git, GitHub, VS Code, Postman
